# End-of-Unit Assessment (page 1 of 3)

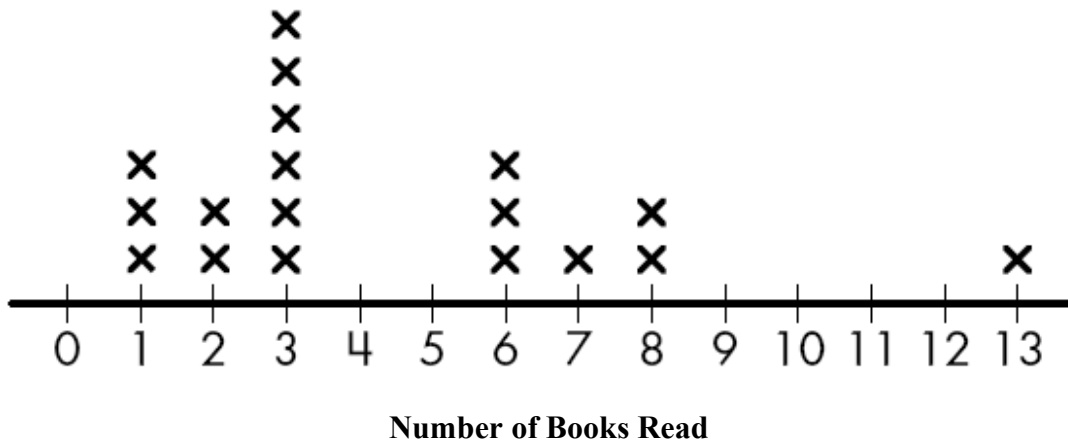

## **Problem 1 How Many Books in a Week?**

- Look at the data about books your class reads in a week.
- Make a representation of these data.

# End-of-Unit Assessment (page 2 of 3)

## Problem 2 Third Graders: How Many Books in a Week?

1. How many third grade students read 6 books?
2. What is the fewest number of books read by a third grade student?
3. What is the greatest number of books read by a third grade student?
4. How many third grade students read less than 4 books in a week?
5. How many third grade students read more than 4 books in a week?
6. What is the most common number of books read by a third grade student?

## End-of-Unit Assessment (page 3 of 3)

7. Compare your data with the third grade data.

Write one thing you notice about the third grade data compared to your data:

---

---

---

---

---

Write something else you notice about the third grade data compared to your data:

---

---

---

---

---
